

Md Salman (Software Developer)

+91 7667063383 md.salman59765976@gmail.com LinkedIn GitHub Portfolio

Professional Summary

Software engineering undergraduate with strong foundation in data structures, algorithms, and object oriented design. Experienced in designing, coding, testing, and deploying software across the full SDLC, with hands on work in distributed systems, real time applications, and production debugging.

Technical Skills

Programming Languages: C++, C, JavaScript, TypeScript

Frontend: React, Next.js, Redux, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST APIs, WebSockets

Databases and Caching: MongoDB, MySQL, Redis

CS Coursework: Data Structures and Algorithms, Operating Systems, DBMS, Computer Networks, OOPS

Concepts: Object Oriented Design, Concurrency, Caching, Rate Limiting, Asynchronous Processing

DevOps & Tools: Docker, Git, Postman

Work Experience

TheDesiFood (Awesome E Bazaar India Private Limited), Junior Software Developer Dec 2025 to Present

- Architected and delivered end-to-end full-stack features by integrating dynamic Next.js frontend modules with backend REST APIs across cart, checkout, brand, and collection workflows.
- Designed and implemented backend endpoints for coupon validation, dynamic shipping rules, and content-driven brand and collection pages, improving system modularity and scalability.
- Engineered and shipped **10+ production-grade pages** using reusable and dynamic components, accelerating feature delivery and reducing code duplication.
- Converted static brand and collection pages into backend-driven modules by integrating dynamic descriptions and FAQ sections, eliminating hardcoded content and enabling non-engineering updates.
- Implemented consolidated JSON-LD structured data (Product and Breadcrumb schema) and technical SEO optimizations to improve crawlability, indexing consistency, and rich search result eligibility.

Engineering Projects

CodeSync - Real Time Collaborative Coding Platform [GitHub]

Node.js, WebSockets, Yjs CRDT, Docker, MongoDB, React

- Built a distributed real time collaborative code editor supporting concurrent users using CRDT based state synchronization.
- Designed a Docker based isolated code execution system to safely run user programs in sandboxed environments.
- Implemented session management and fault tolerance to handle disconnects and partial system failures.

Chatterbox - Real Time Communication Platform [GitHub] [Live]

Node.js, Express.js, Socket.io, MongoDB, TypeScript, React, Cloudinary

- Designed and implemented low latency WebSocket based messaging APIs for real time communication.
- Built message persistence and delivery logic to ensure reliability during reconnects.
- Applied authentication, authorization, and input validation to secure backend services.

SilentVoice - Content Sharing and Community Platform [GitHub]

Node.js, Express.js, MongoDB, JWT, Cloudinary, React

- Designed and developed a full stack platform for sharing text, audio, and video content.
- Implemented REST APIs and data models for posts, comments, notifications, and media workflows.
- Added caching, rate limiting, and structured error handling to improve performance and reliability.

Certifications and Simulations

JPMorgan Chase and Co Software Engineering Simulation [Forage]

Hewlett Packard Enterprise Software Engineering Simulation [Forage]

Education

B.M.S College of Engineering, Bengaluru

Bachelor of Engineering in Electronics and Communication Engineering

Expected May 2026

CGPA 7.39 out of 10

Competitive Programming

CodeChef 3 star (1776) [Profile]

LeetCode Knight (1988) [Profile]

Codeforces Specialist (1460) [Profile]

Leadership and Activities

IEEE Society Member, BMSCE

Dec 2022 to Present

Participated in technical workshops and peer learning activities.
